PROFESSIONAL SUMMARY

System administrator and desktop support engineer seeking a role in the UAE, with 9+ years of IT experience across banking, public-sector, enterprise ERP, server administration, networking and end-user support environments. Hands-on experience in Windows Server administration, Active Directory, Group Policy, DNS/DHCP, Cisco networking, patching, desktop, laptop and hardware support (printers, scanners, installation, maintenance and service, OS installation, backup and restore), Microsoft 365, SQL Server operations, disaster recovery and technical documentation. Most recently responsible for IT support and infrastructure operations across 44 State Bank of India branches in the Trivandrum region. Previously lived and worked in the UAE (2015–2017), so familiar with UAE work culture and processes. Strong troubleshooting and remote-support capability with a focus on service continuity, security and minimal downtime.

TECHNICAL CORE COMPETENCIES

Server & OS	Windows Server 2008 R2 / 2012 / 2016 / 2019 / 2022 / 2025; Windows 7/8/10/11; OS deployment and recovery

Directory & Services	Active Directory; Domain Controllers; GPO; DNS; DHCP; user/account administration
Desktop Support	Desktop and laptop troubleshooting; L1/L2 helpdesk; remote and onsite support; user onboarding; account lockouts and password resets
Networking	LAN/WAN; Cisco Routing & Switching; VLANs; ACLs; basic firewall; port/security configuration; network troubleshooting
Security & Operations	Patch management; Windows Firewall; antivirus/endpoint security; baseline configuration; remote support
Cloud & Database	Microsoft 365 / Office 365 administration; AWS basics (VPC, EC2, CloudFormation); SQL Server 2008 R2 backup, restore and monitoring
Hardware & Endpoint	Installation, service and maintenance of printers, scanners, desktops and laptops; preventive maintenance; OS installation; data backup and restore
Automation & Documentation	PowerShell scripting; technical documentation; asset/inventory records; support logs; failover/recovery procedures; SLA-focused support

PROFESSIONAL EXPERIENCE

Senior Infrastructure Lead / System Administrator — **Jan 2026 – Nov 2026**

Infolink Technologies Pvt. Ltd. — Deputed at State Bank of India (SBI), Trivandrum RBO 4

- Served as the primary technical administrator supporting 44 SBI branches across hardware, software, endpoint and network-related requirements.
- Administered and maintained Active Directory environments, user accounts, domain services, Group Policy updates, DNS and related infrastructure services.
- Performed Windows endpoint deployment, OS installation, configuration, patching, antivirus/endpoint security updates and troubleshooting.
- Executed remote technical support, system recovery and localized data-retrieval procedures to minimize service disruption in banking operations.
- Troubleshot hardware, software and basic LAN/network issues and coordinated vendors or specialist support where required.
- Performed OS installation and reinstallation, driver and application setup, and data backup and restore before and after rebuilds or hardware replacement.
- Installed, configured and maintained printers, scanners and other peripherals across branches; carried out hardware servicing, preventive maintenance and fault rectification.

Senior Systems & ERP Deployment Specialist — **May 2025 – Jan 2026**

Smartipz Business Solutions — Varkala / Trivandrum, Kerala

- Supported enterprise ERP deployments including installation, configuration and client-specific technical mapping.
- Managed SQL Server 2008 R2 backup, restore, monitoring and routine database support activities.
- Administered Microsoft 365 / Office 365 client environments, including provisioning, support and remote troubleshooting.
- Coordinated technical support activities and resolved infrastructure/application issues for business clients.

- Installed and serviced desktops, laptops, printers and scanners; performed preventive maintenance, OS installation and data backup and restore for client systems.

Assistant System Administrator **Dec 2021 – Apr 2025**

C-DIT (Centre for Development of Imaging Technology) — Deputed at Kerala Motor Vehicles Department, Trivandrum

- Managed Windows Server environments, user accounts, Group Policy, Windows Firewall, security updates and patch management for public-sector operations.
- Supported central/server infrastructure and end users, including desktops, printers, scanners and network devices, with a focus on minimal downtime.
- Maintained system documentation, technical logs, hardware/software inventories and recovery/failover procedures.
- Supported Microsoft 365 and Office applications, department-wide video-conferencing infrastructure and remote connectivity.
- Installed, serviced and maintained printers, scanners, desktops and peripherals; performed OS installation, preventive maintenance and user data backup and restore.

System & Network Administrator **Oct 2018 – Dec 2021**

Smartipz Business Solutions — Trivandrum, Kerala

- Installed and maintained servers, desktops, laptops, printers and business software for client environments.
- Provided remote and onsite technical support, OS installation, software upgrades and hardware troubleshooting.
- Monitored and troubleshot LAN/network and IoT-related infrastructure and coordinated vendor support.
- Carried out printer and scanner installation, servicing and preventive maintenance, and data backup and restore for client desktops and servers.

Restaurant Service Staff **2015 – 2017**

The Palace Restaurant — Umm Al Quwain, UAE

- Served customers in a busy restaurant with a multicultural, multilingual clientele.
- Took orders, handled billing and customer queries, and worked rotating shifts as part of a team.

Network Administrator **May 2014 – Sep 2015**

Zeekoi Technologies Private Limited — Kollam, Kerala

- Configured and maintained corporate LAN infrastructure using Cisco routers and switches.
- Performed network monitoring, troubleshooting, routing issue isolation and connectivity support.
- Installed and maintained servers, desktops, laptops, printers and business software; supported Microsoft 365 and Office applications.
- Maintained system documentation, technical logs, hardware/software inventories and recovery/failover procedures.
